Interactive eLearning illustrations for the translation of implementation science into practice

Translation:
Universally accessible eLearning

Complex implementation science concepts accessible without onsite support
- greater reach
- basic/didactic covered online to reduce necessary onsite time
- animated narratives
- scenario-based, narrative examples
- hands-on, experiential learning
- personalized feedback

Learner activity data collection
- fully customized, meaningful data
- line of sight into strengths and weaknesses prior to site contact

Tailoring:
More efficient and effective onsite support

Systematic, strategic, and customized approach to boost onsite impact
- review, extend, enhance, or skip areas depending on existing learner knowledge
- onsite plans detailing how to provide highly tailored support
- greater efficiency of onsite time
- greater learner engagement and motivation
